

ChatScript Highlights

1. Scripted system means you have complete control.
2. Can write concise rules to match patterns of meaning.
3. Control logic is also scriptable for even more control.
4. Can represent and manipulate triples of data + variables.
5. Built-in Dictionary, PosTagging, and Parser for English.
6. Built-in planner for planning actions in a real/virtual world.

7. Tools for managing large systems, including automated testing.

8. High performance server can run many users and bots at once.

9. Standalone can run under Linux, Windows, iOS, Android, Mac.

Example System Stats

It took about 5 person-months to create a high-quality iOS/Android chatbot of 16,000 script lines. It stayed in the top 10 of Apple's App Store *paid* Entertainment category for 6 months. It's still in the top 25 iPad apps 18 months after release.
